Subject Index of Volume 26

Acetonitrile
  adsorption from acetonitrile–benzene mixtures on carbons and oxide adsorbents, 505
Activation
  characterization of catalytic activity of thermally activated hydrotalcite-like compound in propylene oligomerization, 1
  X-ray excited and thermoluminescence of Gd-activated $KCaF_3$, 13
Adsorption
  from acetonitrile–benzene mixtures on carbons and oxide adsorbents, 505
Alloy
  preparation, formation and optical property of In–Sb–Te alloy thin film by flash evaporation technology and vacuum annealing, 253
  pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
  short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
Aluminium
  IR spectroscopic evidence for structural OH groups of spinel alumina modifications, 35
  phase effects on oxidation resistance in Si_3N_4–Al_2O_3–Y_2O_3, 21
  structural modification of aluminium oxynitride phases under stresses at high temperatures, high pressures and under irradiation by fast neutrons, 47
Antimony
  preparation, formation and optical property of In–Sb–Te alloy thin film by flash evaporation technology and vacuum annealing, 253
  pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
Arsenic
  short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
Barium
  microwave sintering of high T_C superconductor $YBa_2Cu_3O_{7-\delta}$, 109
  physical properties of $BaCo_2(PO_4)_2$ in high temperature region, 339
Bentonite
  surface free energy components of homoionic bentonite from contact angle measurements, 375
Benzene
  adsorption from acetonitrile–benzene mixtures on carbons and oxide adsorbents, 505
Boron
  laser carburizing and laser B-carburizing of #20 steel surface, 57
Boronizing processes
  and wear behaviour; effect of cold deformation on, of low carbon steel 1020, 445

Cadmium
  chemical deposition of CdS thin films from acidic bath, 405
  properties of electrochemically obtained mercury cadmium telluride thin films, 421
Calcium
  phase transition of $Ca_{1.5}Nd_{0.5}MnO_4$ phase, 483
  X-ray excited and thermoluminescence of Gd-activated $KCaF_3$, 13
Carbons
  and oxide adsorbents; adsorption from acetonitrile–benzene mixtures on, 505
  spectroscopic studies of:
    charring of rice hulls, 117
    charring of sucrose, 465
    pyrolysis of lignin, 67
    pyrolysis of polyvinylidene fluoride, 193
Carbon steel
  low, 1020: effect of cold deformation on boronizing processes and wear behaviour of, 445
Carburizing
  laser carburizing and laser B-carburizing of #20 steel surface, 57

Elsevier Sequoia/Printed in The Netherlands

Catalytic action
preparation of superacids by metal oxides and their catalytic action, 213
Catalytic activity
characterization of, of thermally activated hydrotalcite-like compound in propylene oligomerization, 1
Charring
of rice hulls; spectroscopic studies of carbons, 117
of sucrose; spectroscopic studies of carbons, 465
Chemical deposition
of CdS thin films from acidic bath, 405
Chromium
effect of tempering on mechanical properties of 50Mn18Cr4WN retaining ring material, 245
influence of multisites in energy transfer of Cr and Nd doubly doped GGG crystals, 181
reaction of H_2S with Pd and Cr ions in Y zeolite: thermogravimetric study, 269
Cleavage fracture behaviour
microstructural effect on, of pearlitic eutectoid steel, 369
Cobalt
doping of Co_3O_4 with Li by solid state reaction in air: EPR evidence of intrinsic disorder reactions in tetrahedral interstitials, 239
physical properties of $BaCo_2(PO_4)_2$ in high temperature region, 339
Cold deformation
effect of, on boronizing processes and wear behaviour of low carbon steel 1020, 445
Contact angle measurements
surface free energy components of homoionic bentonite from, 375
Copper
influence of some electrolytes on e.m.f. measurements in solid-state electrochemical cells with cathodic materials from ternary system $\{(1-x-y)Ag+xCu+yS\}$, 331
microwave sintering of high T_C superconductor $YBa_2Cu_3O_{7-\delta}$, 109
synthesis and thermal decomposition of Cu(II)–Zn(II) hydroxide nitrate mixed crystals, 493
Corrosion rate
steel, in soils by a.c. and d.c. electrochemical methods, 323
Crystallization
kinetics of glasses from Ge–Se–In system, 139
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Crystals
Cr and Nd doubly doped GGG; influence of multisites in energy transfer of, 181
Cu(II)–Zn(II) hydroxide nitrate mixed; synthesis and thermal decomposition of, 493

Decomposition
small angle X-ray scattering study of early stages of, in 10 Ni maraging steel, 527
thermal, and synthesis of Cu(II)–Zn(II) hydroxide nitrate mixed crystals, 493
Doping
doping of Co_3O_4 with Li by solid state reaction in air: EPR evidence of intrinsic disorder reactions in tetrahedral interstitials, 239
influence of multisites in energy transfer of Cr and Nd doubly doped GGG crystals, 181

Electrochemistry
electrochemical instability of metal surfaces in molten carbonate fuel cells interpreted in terms of acid–base effects, 81
influence of some electrolytes on e.m.f. measurements in solid-state electrochemical cells with cathodic materials from ternary system $\{(1-x-y)Ag+xCu+yS\}$, 331
properties of electrochemically obtained mercury cadmium telluride thin films, 421
steel corrosion rate in soils by a.c. and d.c. electrochemical methods, 323
Environmental effects
on surface devitrification of fluorozirconate glasses, 455

F-aggregate centres
and glow curves in $RbMgF_3$, 411
Film(s)
chemical deposition of CdS thin films from acidic bath, 405
preparation, formation and optical property of In–Sn–Te alloy thin film by

flash evaporation technology and vacuum annealing, 253
properties of electrochemically obtained mercury cadmium telluride thin films, 421
pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
Filtration
as method of isoelectric point (IEP) determination, 173
Flash evaporation technology
and vacuum annealing; preparation, formation and optical property of In–Sb–Te alloy thin film by, 253
Fuel cells
molten carbonate; electrochemical instability of metal surfaces in, interpreted in terms of acid–base effects, 81

Gadolinium
growth and glow curves of $KMgF_3$:Gd, 99
X-ray excited and thermoluminescence of Gd-activated $KCaF_3$, 13
Gallium
Li insertion into new quarternary layered compound in $HgGa_2S_4$–$HgIn_2S_4$ system, 151
Gas transport
through metallized polymer membranes, 309
Germanium
crystallization kinetics of glasses from Ge–Se–In system, 139
GGG crystals
Cr and Nd doubly doped; influence of multisites in energy transfer of, 181
Glasses
crystallization kinetics of, from Ge–Se–In system, 139
environmental effects on surface devitrification of fluorozirconate glasses, 455
short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Glow curves
and F-aggregate centres in $RbMgF_3$, 411
and growth of $KMgF_3$:Gd, 99

Hydrotalcite-like compound
thermally activated; characterization of catalytic activity of, in propylene oligomerization, 1

Indium
crystallization kinetics of glasses from Ge–Se–In system, 139
Li insertion into new quarternary layered compound in $HgGa_2S_4$–$HgIn_2S_4$ system, 151
preparation, formation and optical property of In–Sb–Te alloy thin film by flash evaporation technology and vacuum annealing, 253
pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
Ion exchangers
lamellar inorganic: Li^+–K^+–H^+ ion exchange in γ-titanium phosphate, 433
Iron
effect of cold deformation on boronizing processes and wear behaviour of low carbon steel 1020, 445
laser carburizing and laser B-carburizing of #20 steel surface, 57
microstructural characterization of Mg-Fe_2O_4 powders, 513
microstructural effect on cleavage fracture behaviour of pearlitic eutectoid steel, 369
small angle X-ray scattering study of early stages of decomposition in 10Ni maraging steel, 527
steel corrosion rate in soils by a.c. and d.c. electrochemical methods, 323
Irradiation
structural modification of aluminium oxynitride phases under stresses at high temperatures, high pressures and under irradiation by fast neutrons, 47
Isoelectric point (IEP) determination
filtration as method of, 173

Laser
laser carburizing and laser B-carburizing of #20 steel surface, 57
luminescence of Ti in sapphire laser material, 131
pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
Lignin
pyrolysis of; spectroscopic studies of carbons, 67

Lithium
doping of Co_3O_4 with, by solid state reaction in air: EPR evidence of intrinsic disorder reactions in tetrahedral interstitials, 239
lamellar inorganic ion exchangers: Li^+–K^+–H^+ ion exchange in γ-titanium phosphate, 433
Li insertion into new quarternary layered compound in $HgGa_2S_4$–$HgIn_2S_4$ system, 151
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Luminescence
of Ti in sapphire laser material, 131
X-ray excited and thermo-, of Gd-activated $KCaF_3$, 13

Magnesium
glow curves and F-aggregate centres in $RbMgF_3$, 411
growth and glow curves of $KMgF_3$:Gd, 99
microstructural characterization of $MgFe_2O_4$ powders, 513
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Manganese
effect of tempering on mechanical properties of 50Mn18Cr4WN retaining ring material, 245
influence of division state on oxidation mechanism of $NiMn_2O_4$, 395
phase transition of $Ca_{1.5}Nd_{0.5}MnO_4$ phase, 483
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Mechanical properties
effect of tempering on, of 50Mn18-Cr4WN retaining ring material, 245
Membranes
metallized polymer; gas transport through, 309
Mercury
Li insertion into new quarternary layered compound in $HgGa_2S_4$–$HgIn_2S_4$ system, 151
properties of electrochemically obtained mercury cadmium telluride thin films, 421
Microporous solids
evaluation of structural heterogeneities and surface irregularities of, 87
Microstructural characterization
of $MgFe_2O_4$ powders, 513
Microstructural effect
on cleavage fracture behaviour of pearlitic eutectoid steel, 369
Microwave sintering
of high T_C superconductor $YBa_2Cu_3O_{7-\delta}$, 109
Molten carbonate fuel cells
electrochemical instability of metal surfaces in, interpreted in terms of acid–base effects, 81

Neodymium
influence of multisites in energy transfer of Cr and Nd doubly doped GGG crystals, 181
phase transition of $Ca_{1.5}Nd_{0.5}MnO_4$ phase, 483
Nickel
influence of division state on oxidation mechanism of $NiMn_2O_4$, 395
small angle X-ray scattering study of early stages of decomposition in 10Ni maraging steel, 527

Oligomerization
propylene; characterization of catalytic activity of thermally activated hydrotalcite-like compound in, 1
Optical property
and preparation and formation of In–Sb–Te alloy thin film by flash evaporation technology and vacuum annealing, 253
Oxidation
mechanism; influence of division state on, of $NiMn_2O_4$, 395
resistance; phase effects on, in Si_3N_4–Al_2O_3–Y_2O_3, 21
Oxide adsorbents
and carbons: adsorption from acetonitrile–benzene mixtures on, 505

Palladium
reaction of H_2S with Pd and Cr ions in Y zeolite: thermogravimetric study, 269
Phosphorus
lamellar inorganic ion exchangers: Li^+–K^+–H^+ ion exchange in γ-titanium phosphate, 433

physical properties of $BaCo_2(PO_4)_2$ in high temperature region, 339
Polymer membranes
metallized; gas transport through, 309
Polyvinylidene fluoride
pyrolysis of; spectroscopic studies of carbons, 193
Potassium
growth and glow curves of $KMgF_3$:Gd, 99
lamellar inorganic ion exchangers: Li^+–K^+–H^+ ion exchange in γ-titanium phosphate, 433
X-ray excited and thermoluminescence of Gd-activated $KCaF_3$, 13
Propylene oligomerization
characterization of catalytic activity of thermally activated hydrotalcite-like compound in, 1
Pyrolysis
of lignin; spectroscopic studies of carbons, 67
of polyvinylidene fluoride; spectroscopic studies of carbons, 193

Rice hulls
charring of; spectroscopic studies of carbons, 117
Rubidium
glow curves and F-aggregate centres in $RbMgF_3$, 411

Sapphire laser material
luminescence of Ti in, 131
Selenium
crystallization kinetics of glasses from Ge–Se–In system, 139
short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
Semiconductor
short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
Silicon
phase effects on oxidation resistance in Si_3N_4–Al_2O_3–Y_2O_3, 21
solid solution phases from thermally crystallized lithia manganese magnesia silicate glasses, 283
Silver
influence of some electrolytes on e.m.f. measurements in solid-state electrochemical cells with cathodic materials from ternary system $\{(1-x-y)Ag+xCu+yS\}$, 331
Soils
steel corrosion rate in, by a.c. and d.c. electrochemical methods, 323
Spectroscopy
doping of Co_3O_4 with Li by solid state reaction in air: EPR evidence of intrinsic disorder reactions in tetrahedral interstitials, 239
IR spectroscopic evidence for structural OH groups of spinel alumina modifications, 35
spectroscopic studies of carbons:
charring of rice hulls, 117
charring of sucrose, 465
pyrolysis of lignin, 67
pyrolysis of polyvinylidene fluoride, 193
Spinel
IR spectroscopic evidence for structural OH groups of spinel alumina modifications, 35
Steel
effect of cold deformation on boronizing processes and wear behaviour of low carbon steel 1020, 445
laser carburizing and laser B-carburizing of #20 steel surface, 57
microstructural effect on cleavage fracture behaviour of pearlitic eutectoid steel, 369
small angle X-ray scattering study of early stages of decomposition in 10Ni maraging steel, 527
steel corrosion rate in soils by a.c. and d.c. electrochemical methods, 323
Stresses
structural modification of aluminium oxynitride phases under, at high temperatures, high pressures and under irradiation by fast neutrons, 47
Structural heterogeneities
and surface irregularities of microporous solids; evaluation of, 87
Structural modification
of aluminium oxynitride phases under stresses at high temperatures, high pressures and under irradiation by fast neutrons, 47
Structural OH groups
IR spectroscopic evidence for, of spinel alumina modifications, 35

Sucrose
charring of; spectroscopic studies of carbons, 465
Superacids
preparation of, by metal oxides and their catalytic action, 213
Superconductor
high T_C $YBa_2Cu_3O_{7-\delta}$; microwave sintering, 109
Surfaces
electrochemical instability of metal surfaces in molten carbonate fuel cells interpreted in terms of acid–base effects, 81
environmental effects on surface devitrification of fluorozirconate glasses, 455
evaluation of surface irregularities and structural heterogeneities of microporous solids, 87
laser carburizing and laser B-carburizing of #20 steel surface, 57
surface free energy components of homoionic bentonite from contact angle measurements, 375

Tellurium
preparation, formation and optical property of In–Sb–Te alloy thin film by flash evaporation technology and vacuum annealing, 253
properties of electrochemically obtained mercury cadmium telluride thin films, 421
pulse laser beam induced band structure formed in In–Sb–Te alloy film, 297
short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by X-ray diffraction, 347
Tempering
effect of, on mechanical properties of 50Mn18Cr4WN retaining ring material, 245
Tetrahedral interstitials
EPR evidence of intrinsic disorder reactions in: doping of Co_3O_4 with Li by solid state reaction in air, 239
Thermal activation
characterization of catalytic activity of thermally activated hydrotalcite-like compound in propylene oligomerization, 1
Thermal decomposition
and synthesis of Cu(II)–Zn(II) hydroxide nitrate mixed crystals, 493
Thermogravimetric study
reaction of H_2S with Pd and Cr ions in Y zeolite, 269
Thermoluminescence
X-ray excited and, of Gd-activated $KCaF_3$, 13
Titanium
lamellar inorganic ion exchangers: Li^+–K^+–H^+ ion exchange in γ-titanium phosphate, 433
luminescence of, in sapphire laser material, 131
Tungsten
effect of tempering on mechanical properties of 50Mn18Cr4WN retaining ring material, 245

Vacuum annealing
and flash evaporation technology; preparation, formation and optical property of In–Sb–Te alloy thin film by, 253
X-ray
diffraction; short-range order and spatial atomic distribution model for semiconducting glassy alloy $As_{0.35}Se_{0.30}Te_{0.35}$ by, 347
excited and thermoluminescence of Gd-activated $KCaF_3$, 13
small angle, scattering study of early stages of decomposition in 10Ni maraging steel, 527

Yttrium
microwave sintering of high T_C superconductor $YBa_2Cu_3O_{7-\delta}$, 109
phase effects on oxidation resistance in Si_3N_4–Al_2O_3–Y_2O_3, 21
reaction of H_2S with Pd and Cr ions in Y zeolite: thermogravimetric study, 269

Zeolite
reaction of H_2S with Pd and Cr ions in Y zeolite: thermogravimetric study, 269
Zinc
synthesis and thermal decomposition of Cu(II)–Zn(II) hydroxide nitrate mixed crystals, 493
Zirconium
environmental effects on surface devitrification of fluorozirconate glasses, 455
